Technical Delegate's Report

After the race in Monaco, car number 27 was randomly chosen among the top ten cars for more extensive physical inspections.

Subject to these physical inspections were the steering rack and the steering column as well as all attached sensors, their loom routing and connections to the standard ECU.

In relation to Article C8, the following items were checked:

- Control electronics used for steering inputs/sensors homologated and registered.
- Number, type, installation and identification of sensors.
- Connection to the FIA standard ECU.
- FIA-F1-DOC-001-F submissions.

In relation to Article C10.5, the following items were checked:

- Power assisted steering system not electronically controlled or electrically powered and no additional function.
- Constant steering ratio.

In relation to Article C13.8, the following items were checked:

- Steering column homologation

All inspected components were found to be in conformance with the 2026 Formula One Technical Regulations.

Jo Bauer

The FIA Formula 1 Technical Delegate
