Car Presentation – 2026 Singapore Grand Prix Mercedes-AMG PETRONAS F1 Team

	Updated component	Primary reason for update	Geometric differences compared to previous version	Brief description on how the update works (min 20, max 100 words)
1	Front Wing	Performance - Flow Conditioning	Change in chord distribution between three wing elements; switch to two element SM	Change in chordwise and spanwise loading, results in improved performance across the operating envelope, including improved front tyre wake control.
2	Front Wing Endplate	Performance - Flow Conditioning	Front wing endplate and footplate adjusted to accommodate the above. Diveplane camber adjusted.

FIA FORMULA 1 WORLD CHAMPIONSHIP

Car Presentation – Singapore Grand Prix Oracle Red Bull Racing

	Updated component	Primary reason for update	Geometric differences compared to previous version	Brief description on how the update works (min 20, max 100 words)
1	Front wing	Performance - Local Load	Revised end plate and flap geometries	A new wing design has been achieved by modifying a previous front wing assembly, which has been further optimised to offer more local load whilst maintaining the flow stability.
2	Rear Wheel Bodywork	Reliability	Enlarged exit duct	By modifying existing parts, a larger exit duct has been achieved for more cooling flow to cope with the anticipated brake energy of the Singapore circuit
