Technical Delegate's Report

After the race in Zandvoort, car number 10 was randomly chosen among the top ten cars for more extensive physical inspections.

Subject to these physical inspections were the re-programmable electronic devices and the SECU.

In particular, a team electronic device, containing reprogrammable software, was selected and checked against the provisions of Article C8.1:

The software version and source code were registered with the FIA.

A suitable mechanism was used to verify that the software version loaded onto the custom unit matched the registered version.

A detailed inspection of the source code was carried out.

In addition to the above, the SECU software, the configuration files and the data offloads were verified.

All inspected items were found to be in compliance with the 2026 Formula One Technical Regulations.

Jo Bauer

The FIA Formula 1 Technical Delegate
