The FIA Formula 1 Race Director

F1 POWER UNIT INFORMATION TO THE TEAMS AND PUMs

2026 DUTCH GRAND PRIX

COMPETITION INFORMATION

ROUND No.	R12
VENUE	Zandvoort
CENTRELINE	4.259 km
FORMAT	Alternative
DATE	21-23 August

POWER AND ENERGY LIMITS

Article C5.2.10 Maximum Recharge per lap					Article C5.12.8 Maximum PU Power Reduction Rate	
Sprint & Race		Sprint Qualifying & Qualifying	Free Practice sessions	Out laps other than in Sprint and Race	Power Limited Distance	Rate Limit
Overtake <u>not</u> active	Overtake active					
8.5 MJ	9.0 MJ	7.5 MJ	9.0 MJ	9.0 MJ	2411 m	100 kW/s

Article C5.2.8 Maximum DC power of ERS-K function of car speed				
Sprint & Race			Any Practice Session incl. Qualifying Sessions	
Main Overtaking Zones		Other parts of the Lap		
Overtake <u>not</u> active	Overtake active			
Base - Standard	Base - Overtake	Alt 1	Base - Overtake	

IDENTIFICATION OF SECTORS WHERE EXCEPTIONS APPLY

Article C5.2.8iii Sectors where the alternative power curve defined above applies in Sprint & Race		Article C5.12.4 Sectors where the PU power reduction at the start of a Power Limited Pending period can be greater than 150kW (sectors indicated by [] are for SQ and Q only)			Article C5.12.5 Sectors where a reset of MGUK power reduction is permitted (sectors indicated by [] are for SQ and Q only)	
Identification of Sectors	Lap distance window [m]	Identification of Sectors	Lap distance window [m]	Maximum PU power reduction permitted	Identification of Sectors	Lap distance window [m]
T1-T3 T8-T10 T11-T13	350-800 2000-2450 3100-3400	T2-T3 T8-T10 [Exit T13]	670-800 2000-2450 [3450-3650]	350kW 350kW [350kW]	[Exit T14]	[3700-4200]

Article C5.12.7 Sectors with a higher speed threshold		
Identification of Sectors	Lap distance window [m]	Speed threshold
